5 Configure start up wizard

Select the screen resolution from the drop-down menu based on your TV/monitor’s resolution.

Resolution
- System Resolution: 1024*768/60Hz

Check this box if you wish to see this wizard again after you reboot your system.

Wizard
- Start wizard when device starts?

We strongly recommend that you change the default Admin password ‘abc12345’ for better security protection.

Wizard
- Admin Password: ********
- New Admin Password:
- New Password:
- Confirm

Select the applicable time zone, date/time format, and time.

Wizard
- Time Zone: GMT-08:00
- Date Format: MM-DD-YYYY
- System Format: 24h
- System Time: 18:14:37

We recommend checking ‘Enable DHCP’ even if your NVR is not connected to the internet, this will automatically get the NVR IP address.

Wizard
- Enable DHCP: 
- IP Address: 192.0.0.64

The wizard will show additional network information, click ‘Next’ to proceed.

Wizard
- NVR Type: 1080P HD DVR
- Enable DHCP: 
- IPv4 Address: 192.0.0.64

To initialize the hard drive click the ‘Init’ box otherwise the NVR will NOT record.

Wizard
- Server Port: 8000
- HTTP Port: 80
- RTSP Port: 8054

If you wish to add an IP camera click ‘Search’ otherwise, click ‘Next’ to proceed.

Wizard
- IP Address: 192.168.1.36
- Amount: 1
- Model:

Choose continuous or motion detection recording from the listed options. Check the ‘Start Recording’ box to initialize recording. Click ‘OK’ to finish the wizard.

Wizard
- Start Recording
- Continuous
- Motion Detection

**Troubleshooting**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>No display/black screen</td>
<td>Make sure the VGA/HDMI cable is properly connected to both the NVR and TV/monitor</td>
</tr>
<tr>
<td>No audio</td>
<td>A laptop cannot be used as a screen</td>
</tr>
<tr>
<td>No camera output</td>
<td>Make sure your TV/monitor is on the correct video input (e.g. HDMI1, HDMI2, etc.)</td>
</tr>
<tr>
<td>No video</td>
<td>Try switching to another 1080P TV/monitor and adjust the output resolution in the DVR menu</td>
</tr>
<tr>
<td>No picture/No video</td>
<td>On the front of the NVR check that the power LED light is on</td>
</tr>
<tr>
<td>Cannot log in</td>
<td>Make sure the camera is properly connected to the PoE port on the NVR or network switch. If the camera does not support PoE or you are connecting it to a non-PoE switch, you will need additional 12VDC power supply for the camera</td>
</tr>
<tr>
<td>Camera picture is not clear</td>
<td>The default user name is ‘admin’ and the default password is ‘abc12345’. If you don’t remember your old password, please submit a ticket to us at <a href="http://www.laviewsecurity.com">www.laviewsecurity.com</a></td>
</tr>
<tr>
<td>Camera is not placed behind a window</td>
<td>Make sure the camera is not placed behind a window, there is no interference or a strong light source in front of the camera</td>
</tr>
<tr>
<td>Camera is not recording</td>
<td>In DVR menu/Record-Parameter-Resolution, set the sub-stream resolution to CIF for all channels</td>
</tr>
<tr>
<td>Camera is not working</td>
<td>Move the camera to a different location</td>
</tr>
<tr>
<td>Night vision is not working</td>
<td>The infrared arrays operate automatically when the environment is dark enough. You can check that the camera infrared bulbs are working properly as they turn light red in dark environments</td>
</tr>
<tr>
<td>DVR is not recording</td>
<td>Check that the hard drive status is normal and is initialized under the main Menu/Record-Record Schedule/Schedule of the selected camera</td>
</tr>

1. Connect your cameras
   - Connect the Cat5e cable into the camera
   - Connect the other end of the Cat5e cable into the NVR PoE port. (Repeat for all cameras)

2. Connect to your monitor/TV
   - Connect your NVR and TV/monitor with a HDMI or VGA cable (Not included)
   - Note: Your monitor/TV must support the output resolution of the NVR or you may get a black screen or a possible error message. You cannot use a laptop as a display.

3. Connect the mouse and power
   - Connect the mouse to the USB port
   - Connect the NVR power cable to the NVR

4. Connect to your network (OPTIONAL)
   - Connect the LAN port on the NVR to the LAN port on your router via an Ethernet cable for remote viewing on your mobile phone, tablets, PC and Mac
   - You can also add existing IP cameras to your NVR from your network.
   - Note: The NVR will still work as a standalone video recorder if you do not have internet connection and skip this step.

5. Configure the start up wizard
   - The connection is now completed. Turn on the power switch and follow the start-up wizard on your screen to configure the NVR. (Next Page)
